

Setting CO Attainment Targets.

Example - 1

- Same target is identified for all the COs of a course. For example.
- The target can be "The class average marks > 60 marks".

Example - 2

- Target are the same for all COs and are set in terms of performance levels of different groups of students.

Target	% of students getting > 50 and < 65 .	(% of students getting > 65 and < 80)	(% of students getting > 80).
% of students getting < 50			
20	40	30	10

- While this method classifies students into different categories it does not provide any clues to plans for improvement of quality of learning.

Example - 3 \rightarrow Targets are set for each CO of a course and for different groups of students separately.

CO	Targets.			
	(% of student getting < 50)	(% of student getting > 50 & < 65)	(% of students getting > 65 & < 80)	(% of student getting > 80)
CO1	10	30	50	10
CO2	20	30	35	15
CO3	20	30	40	10
CO4	10	45	35	10
CO5	20	20	50	10
CO6	20	20	50	10
